

# David Anthoff

Short biography

November 24, 2021

David Anthoff is an environmental economist who studies climate change and environmental policy. He co-develops the integrated assessment model *FUND* that is used widely in academic research and in policy analysis. His research has appeared in *Nature*, *Science*, the *American Economic Review*, *Nature Climate Change*, the *Journal of the Association of Environmental and Resource Economists* and other academic journals. He contributed a background research paper to the *Stern Review* and has advised numerous organizations (including *US EPA*, the German *Bundesumweltamt* and the Canadian *National Round Table on the Environment and the Economy*) on the economics of climate change.

He is an associate professor in the Energy and Resources Group at the University of California at Berkeley, a senior fellow at the Berkeley Institute for Data Science and a University Fellow at Resources for the Future. Previously he was an assistant professor in the School of Natural Resources and Environment at the University of Michigan, a postdoc at the University of California, Berkeley and a postdoc at the Economic and Social Research Institute in Ireland. He also was a visiting research fellow at the Smith School of Enterprise and the Environment, University of Oxford.

He holds a PhD (Dr. rer. pol.) in economics from the University of Hamburg (Germany) and the International Max Planck Research School on Earth System Modelling, a MSc in Environmental Change and Management from the University of Oxford (UK) and a M.Phil. in philosophy, logic and theory of science from Ludwig-Maximilians-Universität München (Germany).
